## PROFESSIONAL SUMMARY

Backend Developer Trainee at TECHUGO with practical experience in full-stack development using Node.js, Express.js, and MongoDB. Final-year BTech IT student proficient in building scalable RESTful APIs, real-time communication systems, database optimization using aggregation pipelines, and automated systems. Strong problem-solver with 100+ DSA problems solved. Highly motivated to contribute to innovative development teams, with a strong focus on delivering efficient, scalable solutions. Seeking full-time opportunities to leverage technical skills and drive impactful results.

## TECHNICAL SKILLS

**Frontend:** React.js, JavaScript, HTML, CSS  
**Backend:** Node.js, Express.js, RESTful API Design, Middleware & Route Handling, Socket.IO, WebRTC, Cron Jobs, Nodemailer, Multer  
**Database:** MongoDB Atlas, MySQL, Mongoose ODM, Aggregation Pipelines, Schema Design & Validation  
**Architecture:** Repository-Controller-Services Pattern, Environment Configuration  
**Authentication & Security:** JWT Authentication, Bcrypt, Rate Limiting (Arcjet), Firebase  
**Deployment:** Render, Vercel, GitHub, Firebase, MongoDB Atlas  
**Tools:** Git, VS Code, Postman, npm

## PROFESSIONAL EXPERIENCE

### Backend Developer Trainee | TUCHGO

- Develop RESTful APIs using Express.js with Repository-Controller-Services architecture for scalable code organization.
- Implement MongoDB aggregation pipelines for complex data queries and transformations, optimizing database performance.
- Design automated email systems using Nodemailer for transactional emails and user notifications.
- Build scheduled task management using Cron Jobs for automated background processes.
- Implement real-time communication using Socket.IO and WebRTC for peer-to-peer connectivity.
- Implement JWT authentication and Bcrypt password hashing for secure user credential management.

## PROJECTS

### Subscription Tracker API

Node.js, Express.js, MongoDB, QStash, JWT, Nodemailer

- Developed a subscription management system with automated email reminders using Node.js, Express.js, and MongoDB to track recurring payments.
- Implemented secure user authentication with JWT and password encryption using bcrypt for data protection.
- Integrated QStash for scheduled notifications and Nodemailer for email alerts, deployed on Render with MongoDB Atlas.

## CERTIFICATIONS

- Java Programming: Arrays, Lists, and Structured Data – Coursera
- OOP in Java – Coursera
- Introduction to AI – LinkedIn Learning
- Epoch Hackathon Participant – IIIT Delhi
